The Human Frontier Science Program (HFSP) is soliciting applications for the 2011 Long-Term Fellowships (LTF) Program. Long-Term Fellowships (LTFs) are reserved for applicants with a Ph.D. in a biological discipline to embark on a new project in a different field of the life sciences. Preference is given to applicants who propose an original study in biology that marks a departure from their previous Ph.D. or postdoctoral work so as to learn new methods or change study system. The registration deadline for starting an application is August 26th, 2010.

The Human Frontier Science Program (HFSP) supports innovative basic research into fundamental biological problems with emphasis placed on novel approaches that involve scientific exchanges across national and disciplinary boundaries. Biological research has become increasingly quantitative through the participation of scientists from disciplines outside the traditional life sciences such as biophysics, chemistry, computational biology, computer science, engineering, mathematics, nanoscience or...
physics. Such collaborations have opened up new approaches for understanding the complex structures and regulatory networks that characterize the evolution and interactions of organisms and biological systems.

To find more opportunities from this agency, please see [here](#).

For detailed information about this opportunity please see the full solicitation (attached).

Please contact Sponsored Programs (4-5066) with questions regarding proposal submission requirements.
