For the purpose of informing interested faculty, please be aware of the following opportunity. Please note that the other recipients of this announcement could be potential collaborators on this opportunity.

PA-10-152: Diet Composition and Energy Balance (R01)

The National Institutes of Health is soliciting applications investigating the role of diet composition in energy balance, including studies in both animals and humans. Both short and longer-term studies are encouraged, ranging from basic studies investigating the impact of micro-or macronutrient composition on appetite, metabolism, and energy expenditure through clinical studies evaluating the efficacy of diets differing in micro- or macronutrient composition, absorption, dietary variety, or energy density for weight loss or weight maintenance.

For detailed information about this opportunity please see the full solicitation (PA-10-152). To find more opportunities from this agency, please see here.

Because the nature and scope of the proposed research education program will vary from application to application, it is anticipated that the size and duration of each award will also vary. Cost sharing is not required. Please see the full solicitation for complete award information.

Deadline for Proposal to OR-Sponsored Programs: 6/28/2010
(Please see the solicitation for complete application & submission information.)

Please contact Sponsored Programs (4-2402) with questions regarding proposal submission requirements.

Deadline for Proposal Submission to Agency: 7/5/2010
