For the purpose of informing interested University of Tennessee-Knoxville faculty, please be aware of the following opportunity. Please note that the other recipients of this announcement could be potential collaborators on this opportunity.

PA-10-179: Aging Studies in the Pulmonary System (R01)

The National Institutes of Health (NIH), U.S. Dept. of Health and Human Services, is soliciting applications that explore age-associated changes in pulmonary physiology, pathology and function, and their relationship to respiratory conditions and diseases that occur commonly in older populations. The goal of this FOA is to support basic, clinical and translational research to address physiological mechanisms underlying progressive functional declines in the pulmonary system. This research will likely enhance our basic understanding of molecular and cellular aspects of pulmonary aging, which may translate into improvements in the prevention and management of pulmonary diseases in older persons. Projects involving in vitro studies, animal models, and/or human subjects are of significant interest to NIA and NHLBI.

For detailed information about this opportunity please see the full solicitation (PA-10-179). To find more opportunities from this agency, please see here.

Cost sharing is not required. Please see the full solicitation for complete award information.

Deadline for Proposal to OR-Sponsored Programs: 6/25/2010
(Please see the solicitation for complete application & submission information.)

Please contact Sponsored Programs (4-5066) with questions regarding proposal submission requirements.

Deadline for Proposal Submission to Agency: 7/05/2010
