For the purpose of informing interested faculty, please be aware of the following opportunity:

PAR-09-245: Initiative to Maximize Research Education in Genomics (R25)

The National Human Genome Research Institute (NHGRI), National Institutes of Health, is soliciting proposals in response to two important initiatives: (1) short, advanced level courses that are intended to disseminate new laboratory techniques, methods, analyses related to the mission of the NHGRI and (2) research education and training initiatives that are linked to specific NHGRI research initiatives, such as Centers of Excellence in Genomic Science and large-scale sequencing and database grants.

Applications are encouraged for courses designed to address the development of powerful new laboratory techniques, methods and analyses stimulated by genomics and the many ethical, legal and social implications (ELSI) that have been raised by genomics research.

For more information about this opportunity (PAR-09-245) please see the full solicitation here.

Because the nature and scope of the proposed research education program will vary from application to application, it is anticipated that the size and duration of each award will also vary. Cost sharing is not required. Complete award information is found in the full solicitation.

Deadline for Proposal to OR-Sponsored Programs: 9/18/2009
(Please see the solicitation for complete application & submission information.)

Deadline for Proposal Submission to Agency: 9/25/2009
